Objective

Results-driven Backend Developer specializing in Laravel, PHP, MySQL, RESTful APIs, and GraphQL, with 2 years of professional experience delivering scalable and maintainable web solutions. Experienced in backend architecture, database design, API development, and system integration, with a focus on performance, security, and code quality. Complementing my backend expertise, I utilize Python for automation, scripting, data analysis, and AI-powered workflows. I also have hands-on experience building AI automation workflows and chatbots using n8n, integrating AI models and external APIs to automate tasks and streamline business processes. I have a growing interest in Artificial Intelligence, Large Language Models (LLMs), and intelligent automation, and continuously explore ways to integrate these technologies into practical business solutions. Having started my career in frontend development, I bring a full-stack perspective that helps bridge user experience with robust backend systems. I am committed to continuous growth, embracing emerging technologies, and contributing to innovative products that create measurable business value.

Work Experience

Backend Developer (Laravel) 08/2024 – PRESENT
BixoSoft Faisalabad

Frontend Developer 07/2023 – 07/2024
BixoSoft Faisalabad

Frontend Internship 09/2022 – 06/2023
Asdev Tech

Trainee 06/2022 – 08/2022
Csoft Systems
Training after course

Education

BSCS 2020 – 2024
The University Of Faisalabad Fsd
2.75 CGPA

FSc (Pre-Engineering) 2018 – 2020
Punjab Group Of Colleges Fsd
with 61% marks
